

TECHNICAL SPECIFICATIONS

Rectangular plates (2400x1140mm) that assembled between them set the cylinder.

Outside of them are assembled the stiffeners. Each bodysheet can have 2 or 3 stiffeners, separated 1200mm or 800mm respectively.

To install the access door is sent a special bodysheet, with a hole and where is assembled the door.

PARTS AND MATERIALS

1 BODY SHEET

- Bent with waves of 76 x 14mm
- The bodysheet's radio depends of the kind of the silo
- The vertical joint grows from double to octuple according to the requirements
- The horizontal distance between holes is 200 ó 100mm
- The maximum thickness is 4mm ☒ To higher requirements the bodysheets are assembled between them
- MATERIAL: Galvanised steel S350GD Z600 MACO
