

ENVIRONMENTAL POLICY

SYMAGA, a company responsible for manufacturing silos and components for poultry and pig farming, is aware of the importance of environmental conservation and the rational use of natural resources for future generations. For this reason, we are committed to incorporating social and environmental responsibility, energy efficiency and sustainable development practices into all our business activities.

To this end, we are committed to:

- Establishing the continuous improvement of the environmental system as a fundamental principle of our work, optimising the human and material resources involved in each and every one of our processes.
 - Complying with legal and regulatory requirements and other requirements applicable to our sector.
 - Training and raising awareness among all staff on environmental issues, encouraging their suggestions for the improvement of all processes.
 - Protecting the environment, including pollution prevention, and other specific commitments that may be relevant to the context of our organisation
 - Making the SYMAGA Environmental Policy available to the public and interested parties who wish to know it
- SYMAGA Environmental Policy, including pollution prevention, and other specific commitments relevant to the context of SYMAGA

These commitments provide a framework for setting environmental objectives, with quantifiable objectives for specific periods of time being established at Management System Review meetings, specifying the person who will be responsible for their implementation and the resources available to achieve them. This policy is appropriate to the purpose and context of SYMAGA and, in its development, its size and the environmental impacts of its activities, products and services

have been taken into account. Complying with these commitments is the responsibility of every member of our organisation.

The application of this policy will demonstrate to the relevant stakeholders in the context of SYMAGA our company's ongoing concern for environmental protection with an intergenerational vision and sustainable development.

Signed: Chairman
