

LOWER
LOCKING SYSTEM

ACCESSORIES
STAIRS

FILE 5.55
VERSION 1. 11/03/2026

COD. ASCIERESC

TECHNICAL SPECIFICATIONS

Lower locking system for ladders designed to prevent unauthorised access.

The device acts as a safety lock that blocks access to the upper steps, preventing unauthorised persons from climbing.

The staircase access lock can be installed in three different positions. Depending on the position used to install the hinges, the lock will open to the left, to the centre or to the right.

COMPATIBILITY

Compatible with all vertical ladders.

Not compatible with: Inside ladders, spiral ladders, and zig-zag ladders.
